DETAILED ACTION

Election/Restriction

1. Applicant's election without traverse of species 1, claims 1-26 and 29-33 in Paper No. 9 is acknowledged.
2. Claims 29-31 are directed to the embodiment of figure 3A which is a nonelected embodiment. Therefore, these claims are withdrawn from consideration. Claims 32-33 are drawn to the embodiment of figure 4A which is a nonelected embodiment. Therefore, these claims are withdrawn from consideration also.

Accordingly, only claims 1-26 are drawn to the elected embodiment of figure 1A and are examined.

As applicant has NOT agreed that claims 29-33 are nonelected without traverse, examiner cannot cancel these claims. Applicant must cancel the nonelected claims 29-33 (cancellation of claims 27-28 is also recommended) so claims 1-26 can be issued.

Drawings

3. The drawings are objected to for the following reasons.

Figures 1B-4B are improperly cross hatched. All of the parts shown in section, and only those parts, must be cross hatched. The cross hatching patterns should be selected from those shown on page 600-81 of the MPEP based on the material of the part. See also 37 CFR 1.84(h)(3) and MPEP 608.02.

Drawing corrections in compliance with MPEP 608.02(v) are required in response to this office

action.

Specification

4. The specification is objected to for the following reasons.

The application numbers referred to at pages 15, 17, 18, 21, 23, 27 of the specification should be filled in.

The publications listed in the last two paragraphs of page 16 should be submitted on a 1449 for consideration. Examiner was not able to obtain copies of these references.

The abstract is objected to for being more than one paragraph.

The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Correction is required of these and any similar errors in response to this office action.

Treatment of Claims Based on Prior Art

5. Claims 1-26 are allowed. The prior art, while teaching the layered structure of one of the

the
12/16/19 elements or subconductors, does not suggest two such ^{elements} ~~layers~~ being joined at the cap layers.

Related Prior Art

6. The following references are considered pertinent to the present application.

Budai et al. (5968877) disclose the layered structure of a single subtape (substrate, buffer, HTS).

Arendt et al. (5872080) discloses a nickel alloy substrate with metal oxide and YSZ buffer layers

and YBCO HTC layer (20).

Nies (6309767) also discloses a substrate (3), buffer 4), HTS (5) and cap (6).

Laskaris (5047741) discloses superconducting layers (27) joined at cap layer (25). Nevertheless, there is only one cap layer. Furthermore, the superconductors are not high temperature.

Tanaka et al. (5430011) discloses in figure 4, two HTC layers joined, but fails to teach two cap layers, one on each of the HTC layers, the HTC layers being joined at the cap layers.

Closing

7. Any inquiries related to the examination of this application should be directed to Ex. K. Cuneo at (703) 308-1233 or her supervisor Ex. J Gaffin at (703) 308-3301. Inquiries of a general nature should be directed to the receptionist of Group 2800 at (703) 308-0956. The fax numbers for Group 2800 are (703) 308-7722 and 7724.
